

App review request for Auromindai (app ID 990851527207522)

Downloaded on June 27, 2026, 11:29 PM PDT

Permission usage

[instagram_business_basic] Tell us how you're using this permission or feature Auromind uses instagram_business_basic to retrieve essential profile information from connected Instagram Business and Creator accounts. Specifically, we use this permission to: - Retrieve the Instagram Business Account ID, username, and profile details when a business connects their account to Auromind - Verify that the connected account is a Professional (Business or Creator) account before enabling messaging features - Display the connected account name and profile picture in the Auromind dashboard for easy identification - Associate the correct Instagram account with the business's Auromind workspace during the onboarding flow This permission is the foundational requirement for accessing instagram_business_manage_messages, as it establishes the identity of the connected Instagram Professional account.
[instagram_business_basic] Provide a detailed step-by-step video walkthrough of how your app will use this permission or feature so we can confirm it is used correctly and does not violate our policies. • video
[instagram_business_basic] The instagram_business_basic allows your app to read an Instagram Business account profile's info and media. The allowed usage for this permission is to get basic metadata of an Instagram Business account profile, for example username and ID. You may also use this permission to request analytics insights to improve your app and for marketing or advertising purposes, through the use of aggregated and de-identified or anonymized information (provided such data cannot be re-identified). If approved, I agree that any data I receive through instagram_business_basic will be used in accordance with the allowed usage.
[whatsapp_business_messaging] Tell us how you're using this permission or feature Auromind is a multi-channel customer engagement platform that enables businesses to manage WhatsApp conversations from a unified dashboard. We use whatsapp_business_messaging to: - Send and receive messages between businesses and their customers - Send approved template messages for order updates, alerts, and notifications - Handle incoming customer messages via webhooks and route them to the appropriate support agent or automation flow - Upload and retrieve media (images, documents) shared in conversations - Manage WhatsApp Business Profile information on behalf of connected accounts Businesses connect their WhatsApp Business Account to Auromind via Embedded Signup. Once connected, our platform acts as the messaging layer for their customer support and marketing workflows.
[whatsapp_business_messaging] Provide a detailed step-by-step video walkthrough of how your app will use this permission or feature so we can confirm it is used correctly and does not violate our policies. • video
[whatsapp_business_messaging] The whatsapp_business_messaging permission allows an app to send WhatsApp messages to a specific phone number, upload and retrieve media from messages, manage and get WhatsApp business profile information, and to register those phone numbers with Meta. The allowed usage for this permission is to create messaging experiences initiated by a customer or a business. You may also use this permission to request analytics insights to improve your app and for marketing or advertising purposes, through the use of aggregated and de-identified or anonymized information (provided such data cannot be re-identified). If approved, I agree that any data I receive through whatsapp_business_messaging will be used in accordance with the allowed usage.
[instagram_basic] Tell us how you're using this permission or feature Auromind uses instagram_basic to retrieve the connected Instagram Business Account's basic profile information, including account ID, username, and profile details. This is required as a foundational permission to authenticate and link a business's Instagram Professional account to our platform. Without this permission, we cannot identify or associate the correct Instagram account when a business connects their account via our onboarding flow. The account ID retrieved through this permission is used internally to route messages, fetch conversation threads, and display the correct account information in the Auromind dashboard.

[instagram_basic] Provide a detailed step-by-step video walkthrough of how your app will use this permission or feature so we can confirm it is used correctly and does not violate our policies. • video
[instagram_basic] The instagram_basic allows your app to read an Instagram account profile's info and media. The allowed usage for this permission is to get basic metadata of an Instagram Business account profile, for example username and ID. You may also use this permission to request analytics insights to improve your app and for marketing or advertising purposes, through the use of aggregated and de-identified or anonymized information (provided such data cannot be re-identified). If approved, I agree that any data I receive through instagram_basic will be used in accordance with the allowed usage.
[instagram_business_manage_messages] Tell us how you're using this permission or feature Auromind uses instagram_business_manage_messages to allow businesses to view, manage, and respond to Instagram Direct Messages from a unified dashboard. When a customer sends a DM to a business's Instagram Professional account, our platform receives the message via webhook and displays it in the Auromind inbox. The business can then reply directly from our dashboard without switching to Instagram. This permission is essential for businesses that handle high volumes of Instagram DMs and need a centralized CRM-style interface to manage customer conversations efficiently.
[instagram_business_manage_messages] Provide a detailed step-by-step video walkthrough of how your app will use this permission or feature so we can confirm it is used correctly and does not violate our policies. • video
[instagram_business_manage_messages] The instagram_business_manage_messages permission allows an app to access messages on an Instagram professional account. The allowed usage for this permission is to view, manage and respond to messages, and to use third-party customer relationship management (CRM) tools to manage messages. You may also use this permission to request analytics insights to improve your app and for marketing or advertising purposes, through the use of aggregated and de-identified or anonymized information (provided such data cannot be re-identified). If approved, I agree that any data I receive through instagram_business_manage_messages will be used in accordance with the allowed usage.
[whatsapp_business_manage_events] Tell us how you're using this permission or feature Auromind uses whatsapp_business_manage_events to log business events such as customer interactions, conversation milestones, and engagement activities on behalf of connected WhatsApp Business Accounts. This permission enables our platform to track key events like message delivery, read receipts, and customer responses, which helps businesses measure the effectiveness of their WhatsApp communication workflows and optimize their messaging strategies. The event data is used internally within Auromind to provide businesses with conversation analytics and reporting insights in their dashboard.
[whatsapp_business_manage_events] Provide a detailed step-by-step video walkthrough of how your app will use this permission or feature so we can confirm it is used correctly and does not violate our policies. • video
[whatsapp_business_manage_events] The whatsapp_business_manage_events permission allows an app to log events, such as purchase, add-to-cart, leads and more, on behalf of a WhatsApp Business Account administered by an app user. The allowed usage for this permission is to log events on WhatsApp Business Accounts and send this activity data to Meta for ads targeting, optimization and reporting. If approved, I agree that any data I receive through whatsapp_business_manage_events will be used in accordance with the allowed usage.
[business_management] Tell us how you're using this permission or feature

Auromind uses business_management to access and manage Meta Business Portfolio assets on behalf of businesses that onboard through our Embedded Signup flow. Specifically, we use this permission to: - Verify and retrieve WhatsApp Business Account (WABA) details after a business completes the Embedded Signup process - Access business asset information to link WhatsApp and Instagram accounts to the correct business portfolio - Manage system user tokens and business asset permissions for connected accounts - Retrieve business verification status to ensure compliance before enabling messaging features This permission is essential for Auromind to function as a Tech Provider, allowing us to manage multiple client business accounts from our platform without requiring businesses to manually configure their Meta Business Manager settings.

[business_management] Provide a detailed step-by-step video walkthrough of how your app will use this permission or feature so we can confirm it is used correctly and does not violate our policies.

- [video](#)

[business_management] The business_management permission allows your app to read and write with the Business Manager API. The allowed usage for this permission is to manage business assets such as an ad account and to claim ad accounts. You may also use this permission to request analytics insights to improve your app and for marketing or advertising purposes, through the use of aggregated and de-identified or anonymized information (provided such data cannot be re-identified).

If approved, I agree that any data I receive through business_management will be used in accordance with the allowed usage.

[whatsapp_business_management] Tell us how you're using this permission or feature

Auromind uses whatsapp_business_management to manage WhatsApp Business Accounts (WABA) on behalf of businesses that connect through our platform via Embedded Signup. Specifically, we use this permission to: - Retrieve and manage WhatsApp Business Account details - Create, update, and manage message templates for business notifications - Manage phone numbers associated with connected WABAs - Access business profile information to display in the Auromind dashboard - Handle WABA configuration settings on behalf of onboarded businesses This permission is essential for our platform to act as a Tech Provider, enabling businesses to manage their WhatsApp presence through Auromind without needing direct access to Meta Business Manager.

[whatsapp_business_management] Provide a detailed step-by-step video walkthrough of how your app will use this permission or feature so we can confirm it is used correctly and does not violate our policies.

- [video](#)

[whatsapp_business_management] The whatsapp_business_management permission allows your app to read and/or manage WhatsApp business assets you own or have been granted access to by other businesses through this permission. These business assets include WhatsApp business accounts, phone numbers, message templates, QR codes and their associated messages, and webhook subscriptions. The allowed usage for this permission is to manage WhatsApp business assets and display WhatsApp Business Account analytics in your customer portal. You may also use this permission to request analytics insights to improve your app and for marketing or advertising purposes, through the use of aggregated and de-identified or anonymized information (provided such data cannot be re-identified).

If approved, I agree that any data I receive through whatsapp_business_management will be used in accordance with the allowed usage.

[pages_show_list] Tell us how you're using this permission or feature

Auromind uses pages_show_list to retrieve the list of Facebook Pages that a business user manages, in order to identify and link the Facebook Page connected to their Instagram Professional account. When a business connects their Instagram account to Auromind, we use this permission to display the list of available Pages so the user can select the correct Page associated with their Instagram Business account. This permission is a prerequisite for accessing Instagram messaging features, as Instagram Professional accounts must be linked to a Facebook Page to use the Instagram Graph API for DM management.

[pages_show_list] Provide a detailed step-by-step video walkthrough of how your app will use this permission or feature so we can confirm it is used correctly and does not violate our policies.

- [video](#)

[pages_show_list] The pages_show_list permission allows your app to access the list of Pages a person manages. The allowed usage for this permission is to show a person the list of Pages they manage and verify that a person manages a Page. You may also use this permission to request analytics insights to improve your app and for marketing or advertising purposes, through the use of aggregated and de-identified or anonymized information (provided such data cannot be re-identified).

If approved, I agree that any data I receive through pages_show_list will be used in accordance with the allowed usage.
